COMPREHENSIVE ICF CORE SET for GERIATRIC PATIENTS for POST-ACUTE CARE

ODY F	UNCTIONS
physiolo	ogical functions of body systems (including psychological functions)
110	Consciousness functions
	General mental functions of the state of awareness and alertness, including the clarity and continuity of the wakeful state.
	Inclusions: functions of the state, continuity and quality of consciousness; loss of consciousness, coma, vegetative
	states, fugues, trance states, possession states, drug-induced altered consciousness, delirium, stupor
444	Exclusions: orientation functions (b114); energy and drive functions (b130); sleep functions (b134)
114	Orientation functions General mental functions of knowing and ascertaining one's relation to self, to others, to time and to one's
	surroundings.
	Inclusions: functions of orientation to time, place and person; orientation to self and others; disorientation to time, place
	and person Exclusions: consciousness functions (b110); attention functions (b140); memory functions (b144)
117	Intellectual functions
	General mental functions, required to understand and constructively integrate the various mental functions,
	including all cognitive functions and their development over the life span.
	Inclusions: functions of intellectual growth; intellectual retardation, mental retardation, dementia Exclusions: memory functions (b144); thought functions (b160); higher-level cognitive functions (b164)
130	Energy and drive functions
	General mental functions of physiological and psychological mechanisms that cause the individual to move
	towards satisfying specific needs and general goals in a persistent manner. Inclusions: functions of energy level, motivation, appetite, craving (including craving for substances that can be abused)
	and impulse control
	Exclusions: consciousness functions (b110); temperament and personality functions (b126); sleep functions (b134);
134	psychomotor functions (b147); emotional functions (b152)
134	Sleep functions General mental functions of periodic, reversible and selective physical and mental disengagement from one's
	immediate environment accompanied by characteristic physiological changes.
	Inclusions: functions of amount of sleeping, and onset, maintenance and quality of sleep; functions involving the sleep
	cycle, such as in insomnia, hypersomnia and narcolepsy Exclusions: consciousness functions (b110); energy and drive functions (b130); attention functions (b140); psychomotor
	functions (b147)
140	Attention functions
	Specific mental functions of focusing on an external stimulus or internal experience for the required period of
	time. Inclusions: functions of sustaining attention, shifting attention, dividing attention, sharing attention; concentration; dis-
	tractibility
	Exclusions: consciousness functions (b110); energy and drive functions (b130); sleep functions (b134); memory func-
144	tions (b144); psychomotor functions (b147); perceptual functions (b156) Memory functions
	Specific mental functions of registering and storing information and retrieving it as needed.
	Inclusions: functions of short-term and long-term memory, immediate, recent and remote memory; memory span; re-
	trieval of memory; remembering; functions used in recalling and learning, such as in nominal, selective and dissociative amnesia
	Exclusions: consciousness functions (b110); orientation functions (b114); intellectual functions (b117); attention func-
	tions (b140); perceptual functions (b156); thought functions (b160); higher-level cognitive functions (b164); mental
4 4 7	functions of language (b167); calculation functions (b172)
147	Psychomotor functions Specific mental functions of control over both motor and psychological events at the body level.
	Inclusions: functions of psychomotor control, such as psychomotor retardation, excitement and agitation, posturing,
	catatonia, negativism, ambitendency, echopraxia and echolalia; quality of psychomotor function
	plex movements (b176)
152	Emotional functions
	Specific mental functions related to the feeling and affective components of the processes of the mind.
	Exclusions: temperament and personality functions (b126); energy and drive functions (b130)
	Specific mental functions of control over both motor and psychological events at the body level. Inclusions: functions of psychomotor control, such as psychomotor retardation, excitement and agitation, posturin catatonia, negativism, ambitendency, echopraxia and echolalia; quality of psychomotor function Exclusions: consciousness functions (b110); orientation functions (b114); intellectual functions (b117); energy and functions (b130); attention functions (b140); mental functions of language (b167); mental functions of sequencing plex movements (b176) Emotional functions Feltered to the feeling and affective components of the processes of the mind. Inclusions: functions of appropriateness of emotion, regulation and range of emotion; affect; sadness, happines fear, anger, hate, tension, anxiety, joy, sorrow; lability of emotion; flattening of affect

b156	Perceptual functions
	Specific mental functions of recognizing and interpreting sensory stimuli.
	Inclusions: functions of auditory, visual, olfactory, gustatory, tactile and visuospatial perception, such as hallucination or illusion
	Exclusions: consciousness functions (b110); orientation functions (b114); attention functions (b140); memory functions (b144); mental functions of language (b167); seeing and related functions (b210-b229); hearing and vestibular functions
h107	(b230-b249); additional sensory functions (b250-b279)
b167	Mental functions of language
	Specific mental functions of recognizing and using signs, symbols and other components of a language. Inclusions: functions of reception and decryption of spoken, written or other forms of language such as sign language; functions of expression of spoken, written or other forms of language; integrative language functions, spoken and writ- ten, such as involved in receptive, expressive, Broca's, Wernicke's and conduction aphasia Exclusions: attention functions (b140); memory functions (b144); perceptual functions (b156); thought functions (b160); higher-level cognitive functions (b164); calculation functions (b172); mental functions of complex movements (b176); Chapter 2 Sensory Functions and Pain; Chapter 3 Voice and Speech Functions
b176	Mental function of sequencing complex movements
0170	Specific mental functions of sequencing and coordinating complex, purposeful movements.
	Inclusions: impairments such as in ideation, ideomotor, dressing, oculomotor and speech apraxia
	Exclusions: psychomotor functions (b147); higher-level cognitive functions (b164); Chapter 7 Neuromusculoskeletal and
	Movement-Related Functions
h 100	
b180	Experience of self and time functions
	Specific mental functions related to the awareness of one's identity, one's body, one's position in the reality of
	one's environment and of time.
	Inclusions: functions of experience of self, body image and time
b210	Seeing functions
	Sensory functions relating to sensing the presence of light and sensing the form, size, shape and colour of the
	visual stimuli.
	Inclusions: visual acuity functions; visual field functions; quality of vision; functions of sensing light and colour, visual
	acuity of distant and near vision, monocular and binocular vision; visual picture quality; impairments such as myopia,
	hypermetropia, astigmatism, hemianopia, colour-blindness, tunnel vision, central and peripheral scotoma, diplopia, night
	blindness and impaired adaptability to light
	Exclusion: perceptual functions (b156)
b215	Functions of structures adjoining the eye
	Functions of structures in and around the eye that facilitate seeing functions.
	Inclusions: functions of internal muscles of the eye, eyelid, external muscles of the eye, including voluntary and tracking movements and fixation of the eye, lachrymal glands, accommodation, pupillary reflex; impairments such as in nystag- mus, xerophthalmia and ptosis
	Exclusions: seeing functions (b210); Chapter 7 Neuromusculoskeletal and Movement-related Functions
b230	Hearing functions
	Sensory functions relating to sensing the presence of sounds and discriminating the location, pitch, loudness and guality of sounds.
	Inclusions: functions of hearing, auditory discrimination, localization of sound source, lateralization of sound, speech
	discrimination; impairments such as deafness, hearing impairment and hearing loss
	Exclusions: perceptual functions (b156) and mental functions of language (b167)
b240	Sensations associated with hearing and vestibular functions
0240	Sensations of dizziness, falling, tinnitus and vertigo.
	Inclusions: sensations of ringing in ears, irritation in ear, aural pressure, nausea associated with dizziness or vertigo Exclusions: vestibular functions (b235); sensation of pain (b280)
b260	Proprioceptive function
	Sensory functions of sensing the relative position of body parts.
	Inclusions: functions of statesthesia and kinaesthesia
	Exclusions: vestibular functions (b235); sensations related to muscles and movement functions (b780)
b265	Touch function
0200	
	Sensory functions of sensing surfaces and their texture or quality. Inclusions: functions of touching, feeling of touch; impairments such as numbness, anaesthesia, tingling, paraesthesia and hyperaesthesia Exclusions: sensory functions related to temperature and other stimuli (h270)
h070	Exclusions: sensory functions related to temperature and other stimuli (b270)
b270	Sensory functions related to temperature and other stimuli
	Sensory functions of sensing temperature, vibration, pressure and noxious stimulus.
	Inclusions: functions of being sensitive to temperature, vibration, shaking or oscillation, superficial pressure, deep pres-
	sure, burning sensation or a noxious stimulus
	Exclusions: touch functions (b265); sensation of pain (b280)
b280	Sensation of pain
	Sensation of unpleasant feeling indicating potential or actual damage to some body structure.
	Inclusions: sensations of generalized or localized pain in one or more body part, pain in a dermatome, stabbing pain, burning pain, dull pain, aching pain; impairments such as myalgia, analgesia and hyperalgesia

b320	Articulation functions
2010	Functions of the production of speech sounds.
	Inclusions: functions of enunciation, articulation of phonemes; spastic, ataxic, flaccid dysarthria; anarthria
	Exclusions: mental functions of language (b167); voice functions (b310)
b410	Heart functions
	Functions of pumping the blood in adequate or required amounts and pressure throughout the body.
	Inclusions: functions of heart rate, rhythm and output; contraction force of ventricular muscles; functions of heart valves;
	pumping the blood through the pulmonary circuit; dynamics of circulation to the heart; impairments such as tachycardia,
	bradycardia and irregular heart beat and as in heart failure, cardiomyopathy, myocarditis and coronary insufficiency,
-	Exclusions: blood vessel functions (b415); blood pressure functions (b420); exercise tolerance functions (b455)
b415	Blood vessel functions
	Functions of transporting blood throughout the body.
	Inclusions: functions of arteries, capillaries and veins; vasomotor function; functions of pulmonary arteries, capillaries and veins; functions of valves of veins; impairments such as in blockage or constriction of arteries; atherosclerosis,
	arteriosclerosis, thromboembolism and varicose veins
	Exclusions: heart functions (b410); blood pressure functions (b420); haematological system functions (b430); exercise
	tolerance functions (b455)
b420	Blood pressure functions
	Functions of maintaining the pressure of blood within the arteries.
	Inclusions: functions of maintenance of blood pressure; increased and decreased blood pressure; impairments such as
	in hypotension, hypertension and postural hypotension
	Exclusions: heart functions (b410); blood vessel functions (b415); exercise tolerance functions (b455)
b430	Haematological system functions
	Functions of blood production, oxygen and metabolite carriage, and clotting.
	Inclusions: functions of the production of blood and bone marrow; oxygen-carrying functions of blood; blood-related
	functions of spleen; metabolite-carrying functions of blood; clotting; impairments such as in anaemia, haemophilia and
	other clotting dysfunctions
	Exclusions: functions of the cardiovascular system (b410-b429); immunological system functions (b435); exercise toler-
	ance functions (b455)
b435	Immunological system functions
	Functions of the body related to protection against foreign substances, including infections, by specific and non-specific immune responses.
	Inclusions: immune response (specific and non-specific); hypersensitivity reactions; functions of lymphatic vessels and
	nodes; functions of cell-mediated immunity, antibody-mediated immunity; response to immunization; impairments such
	as in autoimmunity, allergic reactions, lymphadenitis and lymphoedema
	Exclusion: haematological system functions (b430)
b440	Respiration functions
	Functions of inhaling air into the lungs, the exchange of gases between air and blood, and exhaling air.
	Inclusions: functions of respiration rate, rhythm and depth; impairments such as apnoea, hyperventilation, irregular
	respiration, paradoxical respiration and bronchial spasm and as in pulmonary emphysema.
	Exclusions: respiratory muscle functions (b445); additional respiratory functions (b450); exercise tolerance functions
	(b455)
b450	Additional respiratory functions
	Additional functions related to breathing, such as coughing, sneezing and yawning.
h/55	Inclusions: functions of blowing, whistling and mouth breathing
b455	Exercise tolerance functions
	Functions related to respiratory and cardiovascular capacity as required for enduring physical exertion.
	Inclusions: functions of physical endurance, aerobic capacity, stamina and fatigability Exclusions: functions of the cardiovascular system (b410-b429); haematological system functions (b430); respiration
	functions (b440); respiratory muscle functions (b445); additional respiratory functions (b450)
b460	Sensations associated with cardiovascular and respiratory functions
	Sensations associated with cardiovascular and respiratory functions
	Inclusions: sensations of tightness of chest, feelings of irregular beat, dyspnoea, air hunger, choking, gagging and
	wheezing
	Exclusion: sensation of pain (b280)
b510	Ingestion functions
b510	
b510	Functions related to taking in and manipulating solids or liquids through the mouth into the body. Inclusions: functions of sucking, chewing and biting, manipulating food in the mouth, salivation, swallowing, burping,
b510	Functions related to taking in and manipulating solids or liquids through the mouth into the body. Inclusions: functions of sucking, chewing and biting, manipulating food in the mouth, salivation, swallowing, burping, regurgitation, spitting and vomiting; impairments such as dysphagia, aspiration of food, aerophagia, excessive saliva-
b510	Functions related to taking in and manipulating solids or liquids through the mouth into the body.

ments such as constipation, diarrhoea, watery stool and anal sphincter incompetence or incontinence Exclusions: digestive functions (b515); assimilation functions (b520); sensations associated with the digestive sy (b530) 550 Weight maintenance functions Functions of maintenance of acceptable Body Massi Index (BMU); impairments such as underwe cachexia, wasting, overweight, emaciation and such as in primary and secondary obesity Exclusions: assistilation functions (b520); general metabolic functions (b540); endocrine gland functions (b555) 5535 Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, dreling blaated, and the feeling of abdominal cramps, fullness of stomach, gi feeling, spasm of stomach, gas in stomach and hearthum ecclusions: sensations of matabolic ingestion functions (b510); digestive functions (b515); defecation functions (b5 540 Functions of regulation of essential components of the body such as carbohydrate, proteins and fat, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolism of carbohydrate, protein and fat, catabo arabolism, energy production in the body; increase or decrease in metabolism (arise) (b355) 5454 Water, mineral and electrolyte balance functions (b550); water, mineral and electrolyte balance functions (b455); intermoregulatory functions (b530); andorine infards functions (b550) who as calcium, and optassium; impairments such as in water retention, dehydration, hyperakaeemia, hypocalaeae iron deficiency, hyporatraremia, hyperakaemia and ehypokalaemia exclusions: intermation of water, minerals and electrolytes in the body. Inclusions: functions of warinabiane, balance of inmerals such as calcium, zinc and iron, an	b525	Defecation functions
 ments such as constipation, diarrhoea, watery stool and anal aphincter incompetence or incontinence Exclusions: digestive functions (b515); assimilation functions (b520); sensations associated with the digestive sy (b530) Weight maintenance functions Functions of maintaining appropriate body weight, including weight gain during the developmental period. Inclusions: functions of maintenance of acceptable Body Mass Index (BMI); impairments such as underwe cachexia, wasting, overweight, emaciation and such as in primary and secondary obesity Evolusions: assimilation functions (B520); general metabolic functions (b540); endocrine gland functions (b555) b535 Sensations arising from eating, diriking and related digestive functions. Inclusions: sensations of nausea, diriking and related digestive functions. Inclusions: sensations of nausea, diriking and related digestive functions. b540 General metabolic functions Functions of tagebidy, ingesitori functions (b510); digestive functions (b515); defecation functions (b510); inclusions: functions of metabolic, ingesitori functions (b510); water, mineral and electrolytes and fat, catabol anabolism, energy production in the body; increase or decrease in metabolism of carbohydrate, protein and fat, catabol anabolism, energy production in the body; increase or dimetals such as calcium, zinc and iron, and balance of electro such as sodium and potassium; impaiments such as in water retention, dehydration, hyperakaeemia, hypocalaea iron deliciency, hyponatramein, hyperkalaemia and hypokalaemia Exclusions: intermitions of water balance, balance of interests such as in stress, urge, re overflow, continuous incontinence, bibility of minerals such as in stress, urge, re overflow, continuous incontinence, bibility, and prevalaemia and hypokalaemia Exclusions: interations of uncabage of unitering thadder. Inclusions: functions of uncabage of unite from the urinary bladd		Functions of elimination of wastes and undigested food as faeces and related functions.
 Exclusions: digestive functions (b515); assimilation functions (b520); sensations associated with the digestive sy (b530) Weight maintenance functions Functions of maintenance of acceptable Body Mass Index (BMI); impairments such as underweight environs of maintenance of acceptable Body Mass Index (BMI); impairments such as underweight environs associated with the digestive system Sensations arising from eating, diriking and related digestive functions (b540); endocrine gland functions (b555) Sensations arising from eating, diriking and related digestive functions. (b151); digestive functions (b151); d		Inclusions: functions of elimination, faecal consistency, frequency of defecation; faecal continence, flatulence; impair-
 (b33) (b33) (b) The intervance functions Functions of maintaining appropriate body weight, including weight gain during the developmental period. Inclusions: functions of maintenne of acceptable Body Mass Index (BMI): imperiments such as underwere accheria, wasting, overweight, emaciation and such as in primary and secondary abeaity. Exclusions: assisting to meating, drinking and related digestive functions. (b540): endocrine gland functions (b555) b535 Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, feeling blaated, and the feeling of abdominal cramps, fullness of stomach, gif feeling, spasm of stomach, gas in stomach and hearburn Evicusions: sensations of matabolic inpession inclusions (b510): digestive functions (b515): defecation functions (b550). b540 General metabolic functions Functions of equilation of essential components of the body such as carbohydrate, protein and fat, catabol anabolism, energy production in the body; increase or denease in metabolic rate. Evicusions: standardian functions (b520): weight maintenance functions (b550) water, mineral and electrolyte balance functions (b550): water, mineral and ion, and balance of electro such as sodium and potassium, impairments such as in water retention, dehydration, hyperakaemia, hypocalaeaa in officiency, hyporatramain, hyporatramain, hyperkalaemia and hypokalaemia Evolusions: inclusions of unitation, integravery of unitation unitary continence; impairments such as in stress, urger, everlaw, continuous incontinence, dhibbing, automatis bladder,		
b530 Weight maintenance functions Inclusions: Introlons of maintenance of acceptable Body Mass index (BMI): impairments such as underweight inclusions: Introlons of maintenance of acceptable Body Mass index (BMI): impairments such as underweight is wasting, overweight inclusions: assimilation functions (b520): general metabolic functions (b540): endocrine gland functions (b555) b535 Sensations associated with the digestive system Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, feeling blated, and the feeling of abdominal cramps, fullness of stomach, gir iteling, spasm of stomach, gas in stomach and hearburn Exclusions: sensation of pain (b280): ingestion functions (b510): digestive functions (b515): defecation functions (b5 540 b540 General metabolic functions b541 Functions of regulation of essential components (b510): digestive functions (b515): defecation functions (b5 200; weight maintenance functions (b520); weight maintenance functions (b530); water, mineral and electrolyte bal functions (b643); themoregulatory functions (b550); weight maintenance functions (b553); water, mineral and electrolyte bal functions (b643); themoregulatory functions (b550); endocrine fainds functions (b540); endocrine glands functions (b540); functions (b430); general metabolic functions (b553) b542 Water, mineral and electrolyte balance functions functions (b430); guneral such as in water releation, dephydrate, nypocalaemia functions (b440); sensations associated with functions (b550) b543 Water, mineral and electrolyte balance functions		
Functions of maintaining appropriate body weight, including weight gain during the developmental period. Inclusions: functions of maintenance of acceptable Body Mass Inder (MBM): impairments such as underwee cachexia, wasting, overweight, emaciation and such as in primary and secondary obesity Exclusions: assisting from eating, drinking and related digestive functions. 5535 Sensations arising from eating, drinking and related digestive functions. Inclusions: assistions of ausses, leeling bloated, and the feeling of abdominal cramps, fullness of stomach, gi feeling, spasm of stomach, gas in stomach and hearthum. Exclusions: sensation of pain (ESQE): ingrestion functions (E510), digestive functions (E515); defecation functions (E5 540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrate, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolis rate Exclusions: assimilation functions (E520): weight maintenance functions (E555); b545 Water, mineral and electrolyte balance functions (E545); thermoregulatory functions (E550); endocrine glands functions (E555); hot as sodium and potasium; mpairments such as in water relenion, dehydration, nypercalacemia, hypochalaemia in deficiency, hypematraemia, hypomatraemia, hyperkalaemia and hypochalaemia exclusions: haracitons of whater balance of minerals such as calcium, zinc and iron, and balance of electro such as sodium and potasium; mpairments such as in water relenion, dehydration, nypercalacemia, hypochalaemia exclusions: sensations of jusit, frequency of unination, uninary continence; (mpairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, a	. =	
Inclusions: functions of maintenance of acceptable Body Mass Index (BMI); impairments such as underverse cachevia, wasting, overweight, emaciation and such as in primary and secondary obesity Exclusions: assimilation functions (b550); general metabolic functions (b540); endocrine gland functions (b555) b535 Sensations associated with the digestive system Inclusions: sensations of nausea, feeling bloated, and the feeling of abdominal cramps, fullness of stomach, gai stomach and an is stomach and the nearburn Exclusions: sensation of pain (b280); ingestion functions (b510); digestive functions (b515); defecation functions (b5 b540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrate, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, proteins and fats, carbohygrate, production in the body: increase or decrease in metabolic rate texclusions: assimilation functions (b520); weight maintenance functions (b555) b545 Water, mineral and electrolyte balance functions (b555) b545 Water, mineral and electrolyte balance functions (b555) b545 Water, mineral and electrolyte balance functions (b540); rendocrine glands functions (b540); molocine gland func- (b555). b540 Urination functions of water balance, balance of onimerals such as aclicum, zinc and iron, and balance of electror such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcaemia, thyporantaremit, hypercalaemia and hypokalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555). b620 Urination functions of urination integuency of urination, urinary continence; inpairments such as in stress, urge, rea overflow, continuous incontinence, dribbing, audinatic badder Exclusions: standing form voiding and related urinary functions (b530	
 cachexia, wasting, overweight, emaciation and such as in primary and secondary obesity Exclusions: assing the GS20; general metabolic functions (b540); endocrine gland functions (b555) b535 Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, feeling bloated, and the feeling of abdominal cramps, fullness of stomach, gl feeling, spasm of stomach, gas in stomach and heartburn Exclusions: sensation of pain (b280); ingestion functions (b516); digestive functions (b515); defecation functions (b5 5640 General metabolic functions Functions of regulation of essential components of the body such as carbohydrate, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolic rate, mineral and electrolyte bala textuoris of the stophydrate (b50); water, mineral and electrolyte bala thuctions (b550); weldy: increase or decrease in metabolic rate, Exclusions: assimilation functions (b550); endocrine glands functions (b555) Bots Wear, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: increasing in functions (b450); endocrine glands functions (b540); endocrine gland functions (b540); endocrine gland functions (b540); endocrine gland functions (b540); endocrine gland functions (b464); endocrines of the stophydratem, hyporhatraemia, hyperhallaemia and hypokalaemia Evolutions of uncitons of uncitons (b400); general metabolic functions (b450); endocrine gland functions (b450); endocrines of uncitons (b450); general metabolic functions (b450); endocrine gland functions (b450); Evolutions of a potasium, impairments such as in water retention, dehydration, and balance of electrol toxicons sensations of un		
Exclusions: assimilation functions (b520): general metabolic functions (b540): endocrine gland functions (b555) b535 Sensations associated with the digestive system Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, feeling bloated, and the feeling of addominal cramps, fullness of stomach, gl feeling, spasm of stomach, gas in stomach and heardourn Exclusions: sensation of pain (b280): ingestion functions (b510): digestive functions (b515); defecation functions (b540) b540 Ceneral metabolic functions Functions of regulation of essential components of the body such as carbohydrate, proteins and fat, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabo anabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b535) b545 Water, mineral and electrolyte balance functions incides (b545); themoregulatory functions (b520); subcharging and hybridatemia vicions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance, balance and interval, hyberadatemia, hybridatemia b620 Urination functions b620 Urination functions b620 Urination functions b7 Inclusions: incredins (b530); seneral metabolic functions (b540); endocrine gland func (c555) b620 </th <th></th> <th></th>		
b535 Sensations associated with the digestive system Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, leeling bloated, and the leeling of addominal cramps, fullness of stomach, gi leeling, spasm of stomach, gas in stomach and hearburn Exclusions: sensations of an icago, leeding bloated, and the leeling of addominal cramps, fullness of stomach, gas leeling, spasm of stomach, gas in stomach and hearburn Exclusions: sensations of an icago, is components of the body such as carbohydrates, proteins and fat, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolics, basal metabolic rate, metabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b550); endocrine glands functions (b555) b545 Water, mineral and electrolyte balance functions Functions of the regulation of vater, minerals and electrolytes in the body. Inclusions: functions of water balance, balance of minerals such as calcium, zinc and forn, and balance of electro such as sodium and potassium; impairments such as in water relention, dehydration, hypecralacemia, hypocalace iron deficiency, hypenatraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: hematological system functions (b430); general metabolic functions (b540); endocrine gland func (b553) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: sensations of inompilet voiding of urine (seling of uliness of bladder Exclusions: sinsations of inompilet voiding of uline, seling of uliness of bladder Exclusions: sunctions of pain (b280); urination functions (b620)		
Sensations arising from eating, drinking and related digestive functions. Inclusions: sensations of nausea, feeling bloated, and the feeling of abdominal cramps, fullness of stomach, gi teeling, späsm of stomach, gas in stomach and hearburn Exclusions: sensation of pain (b280); ingestion functions (b510); digestive functions (b515); defecation functions (b5 b540 General metabolic functions Eneral metabolic functions Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: sensitive metabolism, basal metabolic rate, metabolism of carbohydrates, protein and fat, catabo anabolism, energy production in the body, increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b530); water, mineral and electrolyte bal functions (b545); thermoregulatory functions (b550); endecrine glands functions (b555) b545 Water, mineral and electrolyte balance functions Inclusions: functions of water balance, balance of miterals such as calcium, zinc and iron, and balance of electro such as sodium and potassium; impairments such as in water retention, dehydration, hypercatacemia, hyporataemia, hyporkatemia and hypokatemia b550 Urination functions b521 Deructions of una torus, frequency of urination, urinary continence; impairments such as in stress, urge, re overflow, continuous incontinence, dribbilgn, automatic bladder, polyura, urinary retention and urinary urgency Exclusions: sensations of an inclusion gan celated urinary functions (b530) b630 Sensations associated with urinary functions (b640); ensations associated with urinary functions (b64	h535	
Inclusions: sensations of nauséa, reeing bloated, and the return Exclusions: sensation of pain (b280); ingestion functions (b510); digestive functions (b515); defecation functions (b540) 540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basa metabolic rate, metabolism of carbohydrates, protein and fat, catabo anabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b530); weter, mineral and electrolyte balance functions (b543); thermoregulatory functions (b550); endocrine glands functions (b545); bfs45 Water, mineral and electrolyte balance functions Functions of the regulatiion of water, minerals and electrolytes in the body . Inclusions: functions of water balance, balance of minerals such as in water retention, dehydration, hypercalcaemia, hypocalcaed ion deliciency, hypernatraemia, hyponatraemia, hyporataemia and hypokalaemia Exclusions: harmatological system functions (b430); general metabolic functions (b540); endocrine gland funct (b553). b620 Urination functions Functions of discharge of urine from the urinary bladder . Inclusions: innotions (bc10), sensations associated with urinary functions (b630) 630 Sensations associated with urinary functions . Inclusions: sensations of nomelate voifing of uring feeling of fullness of bladder Exclusions: inclose of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small j of on hands and feel; mobili	0000	
Intelling, spasm of stomach, gas in stomach and heartburn Exclusions: sensation of pain (b280); ingestion functions (b510); digestive functions (b515); defecation functions (b540) 5540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabo anabolism, energy production in the body; increase or metabolic rate Exclusions: assimilation functions (b550); motione glands functions (b555) b545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water, pairments such as calcium, zinc and iron, and balance of electrolyte such as sodium and potassium, impairments such as in water retention, dehydraten, hyporataemia, hyporataemia, hyporataemia and hypokalaemia and proteins such as in stress, urge, rei overflow, continuous incontinence, dirbbiling, automatic bladder, polyunia, urinary retention and urinary urgency Exclusions: timation, frequency of urination, functions b620 Urination functions Sensations associated with urinary functions b710 Mobility of joint unctions b710 Mobility of olinting and related urinary functions <		
Exclusions: sensation of pain (b280): ingestion functions (b510); digestive functions (b515); defecation functions (b540) 5540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basa metabolic rate, metabolism of carbohydrate, protein and fat, catabo anabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b530); water, mineral and electrolyte bala functions (b545); thermoregulatory functions (b550); endocrine glands functions (b555) 5545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body . Inclusions: functions of water balance, balance of minerals such as calcium, zinc and iron, and balance of electro such as sodium and potassimi, impairments such as in water retention, dehydration, hypercalcaemia, hypocalcae iron deficiency, hypernatraemia, hyponatraemia, hyperkalaemia and hypokalaemia E Functions of discharge of urine from the urinary bladder. Inclusions: functions of discharge of urination, urinary continence: impairments such as in stress, urge, re overflow, continuous incontinence, dibiling, automatic badder, polyma; urinary retention and urinary urgency Exclusions: sensations of pain (b280); urination functions (b620) b630 Sensations associated with urinary functions fuclusions (inclusions of pain (b280); urination functions (b620) b630 Sensations and paint		
b540 General metabolic functions Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabo anabolism, energy production in the body; increase or metabolism, energy and the top to proteins on the top the processe in metabolism, energy production in the body. Increase or decrease in metabolism, invertial and electrolyte bal functions (b550); endocrine glands functions (b555) b545 Water, mineral and electrolyte balance functions (b550); motocrine glands functions (basis); thermoregulatory functions (b550); endocrine glands functions, bytes and the balance, balance, balance of minerals such as calcium, zinc and iron, and balance of electro such as sodium and potassium; impairments such as in water retention, dehydration, hypercataemia, hyporataemia, hyporataemia, hyporataemia and hypokalaemia and hypokalaemia and hypokalaemia and hypokalaemia and hypokalaemia and hypokalaemia func (b555) b620 Urination functions Functions of unination, frequency of unination, uninary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, ribbiling, automatic bladder, polyunia, uninary functions (b630) b630 Sensations associated with urinary functions Sensations associated with urinary functions Inclusions: sensations of pain (b280); urination functions (b20) b710 Mobility of joint functions (b715); control of voluntary movement functions (b760)		
conversion of one to another, and their breakdown into energy. Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabo anabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b555); b545 Water, mineral and electrolyte balance functions b545 Water, mineral and electrolyte balance functions b745 Water, mineral and electrolyte balance functions b745 Water, mineral and electrolyte balance of minerals such as calcium, zinc and iron, and balance of electrol such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcae iron deficiency, hyperattaremia, hypoatratemia, hypoatralaemia and hypokalaemia Exclusions: theamatological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: tunctions of unination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: associated with urinary functions b630 Sensations arising from voiding and related urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: functions of moba	b540	
Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b535); water, mineral and electrolyte balance functions b545 Water, mineral and electrolyte balance functions <i>inclusions: functions of water balance, balance of minerals such as calcium, zinc and iron, and balance of electrons such as sodium and potassium, impairments such as in water retention, dehydration, hypercalcaemia, hypocalcaer iron deficiency, hypematraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b540); endocrine gland functions (b540); endocrine gland functions (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of uniation, frequency of uniation, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbing, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: ansasociated with urinary functions b630 Sensations associated with urinary functions b710 Mobility of joint functions b710 Mobility of joint functions (b71); control of opluti, shoulder, elbow, wrist, hip, knee, ankle, smali jc of hands and feet; mobility of single or several joints, verteral, shoulder, elbow, wrist, hip, knee, ankle, smali jc of hands and feet; mobility of joints (b72); control of voluntary movement functions (b760) b713 Stabil</i>		Functions of regulation of essential components of the body such as carbohydrates, proteins and fats, the
anabolism, energy production in the body; increase or decrease in metabolic rate Exclusions: assimilation functions (b520); weight maintenance functions (b555); b545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance, balance of minerals such as calcium, zinc and iron, and balance of electro such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcae iron deficiency, hypematraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbiling, automatic bladder, polyuria, urinary tretention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions fuclusions: sensations of noomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of noomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of nain (b280); urination functions (b620) b710 Mobility of joint functions fuclusions: sensations of noiling or single joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc o hands and feet; mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankke, small jc o hands and feet; mobility of joint single joint, several joints		
Exclusions: assimilation functions (b520); weight maintenance functions (b530); water, mineral and electrolyte balance functions b545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance of minerals such as calcium, zinc and iron, and balance of electron such as sodium and potasium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcaet iron deficiency, hypermatraemia, hyporatraemia, hyperkalaemia and hypokalaemia Exclusions: functions of water palaments such as in water retention, dehydration, (b540); endocrine gland funct (b555). b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: tunctions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribling, automatic bladder, polyuria, urinary retention and urinary urgency exclusions: urinary excretory functions (b610); sensations associated with urinary functions b630 Sensations associated with urinary functions sensations arising from volding and related urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of mobility of oi single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of joint single or several joints, and joints generalized; impairments such as in urinclusions: functions (b715); control of voluntary m		Inclusions: functions of metabolism, basal metabolic rate, metabolism of carbohydrate, protein and fat, catabolism,
Indicions (b545): thermoregulatory functions (b550): endocrine glands functions (b555) b545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance, balance of minerals such as calcium, zinc and iron, and balance of electron such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcae iron deficiency, hypernatraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: tunctions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbiling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: sensations of pain (b280); sensations associated with urinary functions (b630) b630 Sensations arising from voiding and related urinary functions Inclusions: tunctions of momplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions functions of the range and ease of movement of a joint. Inclusions: functions of the its generalized; impairments such as in hypermobility of joints, frozen shoulder, arthritis Exclusions : stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions functions (b710); Muscle power functions (b710); <td< th=""><th></th><th></th></td<>		
b545 Water, mineral and electrolyte balance functions Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance of minerals such as calcium, zinc and iron, and balance of electrol such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcae iron deficiency, hypernatraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: innotions of unination, frequency of unination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbing, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of no single or several joints, verebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of isingle or several joints, verebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the tability of a single or several joints, and joints generalized; impairments such as in u ble shoulder, arithritis Exclusion: tunctions (brotis (b715); Exclusion: stabilit		
Functions of the regulation of water, minerals and electrolytes in the body. Inclusions: functions of water balance, balance of minerals such as solium, zinc and iron, and balance of electrol such as solium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcaet iron deficiency, hypernatraemia, hyponatraemia, hyporkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions is unitation, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbing, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary extentory functions (b610); sensations associated with urinary functions (b630) b630 Sensations arising from voiding and related urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet, mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet, mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet, mobility of single or several joints, eretaril joints, frozen joints, frozen shoulder, athritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b710 M		
Inclusions: functions of water balance, balance of minerals such as calcium, zinc and iron, and balance of electron such as sodium and potassium, impairments such as in water retention, dehydration, hypercalacemia, hypocalacemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland funce (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, ribbiling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations arising from voiding and related urinary functions Sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: studity of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions (b715); control of voluntary movement functions (b760) b730 Muscle power functions (b710) b830 Lasions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in urb be shoulder inductions (b710) b730 Muscle power functions (b710) <td< th=""><th>b545</th><th></th></td<>	b545	
 such as sodium and potassium; impairments such as in water retention, dehydration, hypercalcaemia, hypocalcaemia, hyporatraemia, hyporatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions Sensations associated with urinary functions Sensations arising from voiding and related urinary functions Inclusions: sensations of nacomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of nacomplete voiding of urine, feeling of fullness of bladder Exclusions: functions of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and leet; mobility of joint generalized; impairments such as in hypermobility of joints, frozen shoulder, arthritis Exclusions: stability of joint functions brunctions of the stability of a single joint, several joints, and joints generalized; impairments such as in us ble shoulder functions of a joint, dislocation of shoulder and hip Exclusion:: mobility of joint functions (b710) b730 Muscle power functions Functions of the tability of a single joint, several joints, and joints generalized; impairments such as in us ble shoulder joint functions (b710) <l< th=""><th></th><th></th></l<>		
iron deficiency, hypernatraemia, hyponatraemia, hyperkalaemia and hypokalaemia Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions or urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary tenctions (b630) b630 Sensations associated with urinary functions Sensations arising from voiding and related urinary functions Inclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions (b715); control of voluntary movement functions (b760) b730 Muscle power functions (b710)		
Exclusions: haematological system functions (b430); general metabolic functions (b540); endocrine gland func (b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, re- overflow, continuous incontinence, dribbiling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small ji of hands and feet; mobility of joint generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions b730 Muscle power functions Functions related to the force generated by the contraction of a muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one si the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle		
(b555) b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a joint, several joints, and joints generalized; impairments such as in up ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusions: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle groups, muscles of one limb, one sin the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralys		
b620 Urination functions Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Sensations arising from voiding and related urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in up ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles		
Functions of discharge of urine from the urinary bladder. Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, recoverflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Sensations arising from voiding and related urinary functions Inclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in u ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions b730 Muscle power functions functions associated with the power of specific muscles and muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups. Inclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function	b620	
Inclusions: functions of urination, frequency of urination, urinary continence; impairments such as in stress, urge, rei overflow, continuous incontinence, dribbling, automatic bladder, polyuria, urinary retention and urinary urgency Exclusions: urinary excretory functions (b610); sensations associated with urinary functions (b630) b630 Sensations associated with urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, freeling of fullness of bladder Exclusions: sensations of incomplete voiding of urine, freeling of fullness of bladder exclusions: functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jc of hands and feet; mobility of joint sgeneralized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions (b710) </th <th></th> <th></th>

Sensations arising from voiding and related urinary functions Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joint sgeneralized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in u ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadriplegi and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functii (b740) b735 Muscle tone functions		
Inclusions: sensations of incomplete voiding of urine, feeling of fullness of bladder Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joint generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in up ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740) b735 <	b630	
Exclusions: sensations of pain (b280); urination functions (b620) b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in up be shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions b730 Muscle power functions Functions related to the force generated by the contraction of a muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740)		
b710 Mobility of joint functions Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in un ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740)		
Functions of the range and ease of movement of a joint. Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small jo of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in up ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740) b735 Muscle tone functions	1.740	
Inclusions: functions of mobility of single or several joints, vertebral, shoulder, elbow, wrist, hip, knee, ankle, small joint functions and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in up ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions b735 Muscle tone functions	D/10	
of hands and feet; mobility of joints generalized; impairments such as in hypermobility of joints, frozen joints, frozen shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in unble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740) b735 Muscle tone functions		Functions of the range and ease of movement of a joint.
shoulder, arthritis Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in unble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function b735 Muscle tone functions		inclusions: lunctions or mobility of single or several joints, veneoral, shoulder, elbow, wrist, nilp, knee, ankie, small joints of bander, and foot mobility of single or several joints, veneoral, shoulder, elbow, wrist, nilp, knee, ankie, small joints of bander and foot mobility of single or several joints.
Exclusions: stability of joint functions (b715); control of voluntary movement functions (b760) b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in unble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functii (b740) b735 Muscle tone functions		
b715 Stability of joint functions Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in un ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functii (b740) b735 Muscle tone functions		
Functions of the maintenance of structural integrity of the joints. Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in unble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functii (b740) b735 Muscle tone functions	b715	
Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in use ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740)		
ble shoulder joint, dislocation of a joint, dislocation of shoulder and hip Exclusion: mobility of joint functions (b710) b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadriplegiand akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735		Inclusions: functions of the stability of a single joint, several joints, and joints generalized; impairments such as in unsta-
b730 Muscle power functions Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one sid the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735 Muscle tone functions		
Functions related to the force generated by the contraction of a muscle or muscle groups. Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one side the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance functions (b740) b735		Exclusion: mobility of joint functions (b710)
 Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one side the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735 	b730	Muscle power functions
 the body, the lower half of the body, all limbs, the trunk and the body as a whole; impairments such as weakness of small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadripleg and akinetic mutism		
 small muscles in feet and hands, muscle paresis, muscle paralysis, monoplegia, hemiplegia, paraplegia, quadriplegia and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735 		Inclusions: functions associated with the power of specific muscles and muscle groups, muscles of one limb, one side of
 and akinetic mutism Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735 Muscle tone functions 		
 Exclusions: functions of structures adjoining the eye (b215); muscle tone functions (b735); muscle endurance function (b740) b735 Muscle tone functions 		
(b740) b735 Muscle tone functions		
b735 Muscle tone functions		
	b735	
I FUNCTIONS RELATED TO THE TENSION DRESENT IN THE RESTING MUSCLES AND THE RESISTANCE OTHERED WHEN TRVING TO MA		Functions related to the tension present in the resting muscles and the resistance offered when trying to move
the muscles passively.		
		Inclusions: functions associated with the tension of isolated muscles and muscle groups, muscles of one limb, one side
		of the body and the lower half of the body, muscles of all limbs, muscles of the trunk, and all muscles of the body; im-
pairments such as hypotonia, hypertonia and muscle spasticity		pairments such as hypotonia, hypertonia and muscle spasticity
Exclusions: muscle power functions (b730); muscle endurance functions (b740)		Exclusions: muscle power functions (b730); muscle endurance functions (b740)

b755	Involuntary movement reaction functions
	Functions of involuntary contractions of large muscles or the whole body induced by body position, balance
	and threatening stimuli.
	Inclusions: functions of postural reactions, righting reactions, body adjustment reactions, balance reactions, supporting reactions, defensive reactions
	Exclusion: motor reflex functions (b750)
b760	Control of voluntary movement functions
5700	Functions associated with control over and coordination of voluntary movements.
	Inclusions: functions of control of simple voluntary movements and of complex voluntary movements, coordination of
	voluntary movements, supportive functions of arm or leg, right left motor coordination, eye hand coordination, eye foot
	coordination; impairments such as control and coordination problems, e.g. dysdiadochokinesia
	Exclusions: muscle power functions (b730); involuntary movement functions (b765); gait pattern functions (b770)
b765	Involuntary movement functions
	Functions of unintentional, non- or semi-purposive involuntary contractions of a muscle or group of muscles.
	Inclusions: involuntary contractions of muscles; impairments such as tremors, tics, mannerisms, stereotypies, motor
	perseveration, chorea, athetosis, vocal tics, dystonic movements and dyskinesia
	Exclusions: control of voluntary movement functions (b760); gait pattern functions (b770)
b770	Gait pattern functions
	Functions of movement patterns associated with walking, running or other whole body movements.
	Inclusions: walking patterns and running patterns; impairments such as spastic gait, hemiplegic gait, paraplegic gait,
	asymmetric gait, limping and stiff gait pattern
	Exclusions: muscle power functions (b730); muscle tone functions (b735); control of voluntary movement functions (b760); involuntary movement functions (b765)
b780	Sensations related to muscles and movement functions
5700	Sensations related to industries and movement infictions
	Inclusions: sensations of muscle stiffness and tightness of muscles, muscle spasm or constriction, and heaviness of
	muscles
	Exclusion: sensation of pain (b280)
b810	Protective functions of the skin
	Functions of the skin for protecting the body from physical, chemical and biological threats.
	Inclusions: functions of protecting against the sun and other radiation, photosensitivity, pigmentation, quality of skin;
1	insulating function of skin, callus formation, hardening; impairments such as broken skin, ulcers, bedsores and thinning
	of skin
h 900	Exclusions: repair functions of the skin (b820); other functions of the skin (b830)
b820	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin
b820	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin Functions of the skin for repairing breaks and other damage to the skin.
b820	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin Functions of the skin for repairing breaks and other damage to the skin. Inclusions: functions of scab formation, healing, scarring; bruising and keloid formation
	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin Functions of the skin for repairing breaks and other damage to the skin. Inclusions: functions of scab formation, healing, scarring; bruising and keloid formation Exclusions: protective functions of the skin (b810); other functions of the skin (b830)
b820 b840	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin Functions of the skin for repairing breaks and other damage to the skin. Inclusions: functions of scab formation, healing, scarring; bruising and keloid formation Exclusions: protective functions of the skin (b810); other functions of the skin (b830) Sensations related to the skin
	Exclusions: repair functions of the skin (b820); other functions of the skin (b830) Repair functions of the skin Functions of the skin for repairing breaks and other damage to the skin. Inclusions: functions of scab formation, healing, scarring; bruising and keloid formation Exclusions: protective functions of the skin (b810); other functions of the skin (b830)

	BODY STRUCTURES = anatomical parts of the body such as organs, limbs and their components	
s110	Structure of brain	
s120	Spinal cord and related structures	
s320	Structure of mouth	
s410	Structure of cardiovascular system	
s430	Structure of respiratory system	
s610	Structure of urinary system	
s620	Structure of pelvic floor	
s710	Structure of head and neck region	
s720	Structure of shoulder region	
s740	Structure of pelvic region	
s750	Structure of lower extremity	
s760	Structure of trunk	
s770	Additional musculoskeletal structures related to movement	
s810	Structure of areas of skin	

= execut	TIES AND PARTICIPATION ion of a task or action by an individual and involvement in a life situation
d130	Copying
4100	Imitating or mimicking as a basic component of learning, such as copying a gesture, a sound or the letters of an alphabet.
d155	Acquiring skills
	Developing basic and complex competencies in integrated sets of actions or tasks so as to initiate and follow through with the acquisition of a skill, such as manipulating tools or playing games like chess. <i>Inclusion: acquiring basic and complex skills</i>
d177	Making decisions
	Making a choice among options, implementing the choice, and evaluating the effects of the choice, such as selecting and purchasing a specific item, or deciding to undertake and undertaking one task from among sev eral tasks that need to be done. Exclusions: thinking (d163); solving problems (d175)
d230	Carrying out daily routine
u230	Carrying out simple or complex and coordinated actions in order to plan, manage and complete the require-
	ments of day-to-day procedures or duties, such as budgeting time and making plans for separate activities throughout the day. Inclusions: managing and completing the daily routine; managing one's own activity level
d240	Exclusion: undertaking multiple tasks (d220)
0240	Handling stress and other psychological demands Carrying out simple or complex and coordinated actions to manage and control the psychological demands required to carry out tasks demanding significant responsibilities and involving stress, distraction or crises, such as driving a vehicle during heavy traffic or taking care of many children. Inclusions: handling responsibilities; handling stress and crisis
d310	Communicating with - receiving - spoken messages
	Comprehending literal and implied meanings of messages in spoken language, such as understanding that a statement asserts a fact or is an idiomatic expression.
d315	Communicating with - receiving - nonverbal messages
	Comprehending the literal and implied meanings of messages conveyed by gestures, symbols and drawings such as realizing that a child is tired when she rubs her eyes or that a warning bell means that there is a fire. Inclusions: communicating with - receiving - body gestures, general signs and symbols, drawings and photographs
d330	Speaking
	Producing words, phrases and longer passages in spoken messages with literal and implied meaning, such as expressing a fact or telling a story in oral language
d335	Producing nonverbal messages
	Using gestures, symbols and drawings to convey messages, such as shaking one's head to indicate disagree ment or drawing a picture or diagram to convey a fact or complex idea.
d360	Inclusion: producing body gestures, signs, symbols, drawings and photographs Using communication devices and techniques
4300	Using devices, techniques and other means for the purposes of communicating, such as calling a friend on the telephone.
	Inclusions: using telecommunication devices, using writing machines and communication techniques
d410	Changing basic body position
	Getting into and out of a body position and moving from one location to another, such as getting up out of a chair to lie down on a bed, and getting into and out of positions of kneeling or squatting. Inclusions: changing body position from lying down, from squatting or kneeling, from sitting or standing, bending and shifting the body's centre of gravity
d415	Exclusion: transferring oneself (d420) Maintaining a body position
0415	Staying in the same body position as required, such as remaining seated or remaining standing for work or
	school. Inclusions: maintaining a lying, squatting, kneeling, sitting and standing position
d420	Transferring oneself
	Moving from one surface to another, such as sliding along a bench or moving from a bed to a chair, without changing body position.
	Inclusion: transferring oneself while sitting or lying Exclusion: changing basic body position (d410)
d440	Fine hand use
	Performing the coordinated actions of handling objects, picking up, manipulating and releasing them using one's hand, fingers and thumb, such as required to lift coins off a table or turn a dial or knob. Inclusions: picking up, grasping, manipulating and releasing

d445	Hand and arm use
4110	Performing the coordinated actions required to move objects or to manipulate them by using hands and arms,
	such as when turning door handles or throwing or catching an object
	Inclusions: pulling or pushing objects; reaching; turning or twisting the hands or arms; throwing; catching
1450	Exclusion: fine hand use (d440)
d450	Walking
	Moving along a surface on foot, step by step, so that one foot is always on the ground, such as when strolling,
	sauntering, walking forwards, backwards or sideways. Inclusions: walking short or long distances; walking on different surfaces; walking around obstacles
	Exclusions: transferring oneself (d420); moving around (d455)
d460	Moving around in different locations
	Walking and moving around in various places and situations, such as walking between rooms in a house, within
	a building or down the street of a town.
	Inclusions: moving around within the home, crawling or climbing within the home; walking or moving within buildings
1405	other than the home, and outside the home and other buildings
d465	Moving around using equipment
	Moving the whole body from place to place, on any surface or space, by using specific devices designed to facilitate moving or create other ways of moving around, such as with skates, skis, or scuba equipment, or
	moving down the street in a wheelchair or a walker.
	Exclusions: transferring oneself (d420); walking (d450); moving around (d455); using transportation (d470); driving
	(d475)
d510	Washing oneself
	Washing and drying one's whole body, or body parts, using water and appropriate cleaning and drying materi-
	als or methods, such as bathing, showering, washing hands and feet, face and hair, and drying with a towel.
	Inclusions: washing body parts, the whole body; and drying oneself
4500	Exclusions: caring for body parts (d520); toileting (d530)
d520	Caring for body parts Looking after those parts of the body, such as skin, face, teeth, scalp, nails and genitals, that require more than
	washing and drying.
	Inclusions: caring for skin, teeth, hair, finger and toe nails
	Exclusions: washing oneself (d510); toileting (d530)
d530	Toileting
	Planning and carrying out the elimination of human waste (menstruation, urination and defecation), and clean-
	ing oneself afterwards.
	Inclusions: regulating urination, defecation and menstrual care Exclusions: washing oneself (d510); caring for body parts (d520)
d540	Dressing
4340	Carrying out the coordinated actions and tasks of putting on and taking off clothes and footwear in sequence
	and in keeping with climatic and social conditions, such as by putting on, adjusting and removing shirts, skirts,
	blouses, pants, undergarments, saris, kimono, tights, hats, gloves, coats, shoes, boots, sandals and slippers.
	Inclusions: putting on or taking off clothes and footwear and choosing appropriate clothing
d550	Eating
	Carrying out the coordinated tasks and actions of eating food that has been served, bringing it to the mouth and
	consuming it in culturally acceptable ways, cutting or breaking food into pieces, opening bottles and cans, using eating implements, having meals, feasting or dining.
	Exclusion: drinking (d560)
d560	Drinking
4000	Taking hold of a drink, bringing it to the mouth, and consuming the drink in culturally acceptable ways, mixing,
	stirring and pouring liquids for drinking, opening bottles and cans, drinking through a straw or drinking running
	water such as from a tap or a spring; feeding from the breast.
	Exclusion: eating (d550)
d570	Looking after one's health
	Ensuring physical comfort, health and physical and mental well-being, such as by maintaining a balanced diet,
	and an appropriate level of physical activity, keeping warm or cool, avoiding harms to health, following safe sex
	practices, including using condoms, getting immunizations and regular physical examinations. Inclusions: ensuring one's physical comfort; managing diet and fitness; maintaining one's health
d760	Family relationships
4700	Creating and maintaining kinship relationships, such as with members of the nuclear family, extended family,
	foster and adopted family and step-relationships, more distant relationships such as second cousins or legal
	guardians.
	Inclusions: parent-child and child-parent relationships, sibling and extended family relationships
d770	Intimate relationships
	Creating and maintaining close or romantic relationships between individuals, such as husband and wife, lov-
	ers or sexual partners.
	Inclusions: romantic, spousal and sexual relationships

d860	Basic economic transactions
	Engaging in any form of simple economic transaction, such as using money to purchase food or bartering,
	exchanging goods or services; or saving money.
d930	Religion and spirituality
	Engaging in religious or spiritual activities, organizations and practices for self-fulfilment, finding meaning, religious or spiritual value and establishing connection with a divine power, such as is involved in attending a church, temple, mosque or synagogue, praying or chanting for a religious purpose, and spiritual contemplation. <i>Inclusions: organized religion and spirituality</i>
d940	Human rights
